main Dash Board have the 7 Points

1. Solution
2. Products
3. Case Study
4. Training
5. Download
6. Blogs
7. About US

Solution:

In this section, we will present the complete solution. Each solution will be represented by a real image. When a user clicks on a product within the solution—for example, a loop detector—they will be taken to the corresponding product page, where all available types and models of loop detectors will be displayed.

Product:

The solution is divided into three main segments.

1. Vehicle Access Control

- Road Blockers
- Bollards
- Traffic Barriers

When the user selects **Vehicle Access Control**, all available product categories (Road Blockers, Bollards, and Traffic Barriers) are displayed.

When a specific category, such as **Road Blockers**, is selected, all available models for that product are shown.

After the user selects a model, the product details page opens, displaying:

- Key Features
- Product Specifications
- Datasheet (PDF)
- Product manual
- 3D Model
- CAD Drawings
- Product Images

and the similar product will be showing.

Case Studies

- This section showcases our successfully completed projects. Each case study highlights the client's requirements, the proposed solution, the products delivered, and a comparison between the design concept and the actual implemented result. This allows users to understand how our solutions were executed and the outcomes achieved in real-world applications.

Training:

This section provides comprehensive equipment training. The training topics will be organized under main headings, such as **Access Control Wiring Details, Controller Configuration, Card Reader Installation**, and more. When a user clicks on a topic, they will be redirected to the corresponding YouTube tutorial video, where they can watch detailed installation, wiring, configuration, and troubleshooting guides related to that subject.

Download:

In this section, all product configuration software and client software will be available. Users can download the required software for each product, along with installation files, configuration tools, and user guides to simplify setup, programming, and system management.

Blogs:

General as other sides are working.

About US:

Core Values

- **Reliable & Quality Products**
We commit to delivering reliable, tested, and high-quality ELV solutions that meet international standards.
- **Maximum Output with Minimum Resources**
We optimize design, cost, and manpower to achieve the best performance with efficient use of resources.
- **Continuous Technology Upgradation**
We stay updated with the latest technologies and industry trends to provide future-ready solutions.
- **Strong After-Sales Support**
Customer satisfaction does not end at delivery. Responsive after-sales service is our key strength.
- **Knowledge Sharing & Regional Development**
We believe in empowering the new generation by sharing technical knowledge and contributing to the development of our region.

Vision

To establish strong **sales and service branches in major cities within the next 5–7 years**, based on strategic city and market analysis, and become a trusted name in the ELV industry.

Mission

- To deliver **committed, practical, and innovative ELV solutions** for every client requirement.
- To ensure that **for every challenge, we provide a reliable solution.**
- To conduct **technical seminars, educational workshops, and training programs** for industry professionals.
- To create awareness and technical skill development among **electricians and technicians**, customized to their skill levels.
- To accelerate sales through **education-based engagement and value-driven solutions**

Important notes:

Website Login, Registration & User Access Requirements

1. Dashboard & Login

- Add a Dashboard button/menu at the top of the website navigation.
- Users should be able to access the login/registration page from the dashboard.

2. User Registration Form

Before a user can log in and access pricing, they must complete a registration form with the following information:

1. Full Name
2. Company Name
3. City
4. Country (optional)
5. Business Domain/Industry
6. Years of Experience in the Same Field

7. Email Address
8. Mobile Number

After submitting the registration form, the user's account should remain in Pending Approval status until reviewed by the administrator.

3. Admin Approval Process

- Every new registration must appear in the admin dashboard for review.
- The administrator can approve or reject the registration.
- During approval, the administrator can assign the user's access level.

4. User Access Levels

Level 1 (L1) – Default Access

- This is the default access level for all approved users.
- Users can view only the standard/public prices.

Level 2 (L2) – Authorized Distributor

- L2 access is assigned manually by the administrator.
- Only authorized distributors can view L2 pricing.
- L2 users can view both L1 and L2 prices.

Level 3 (L3) – Top-Level Partner/Management

- L3 access is assigned manually by the administrator after mutual agreement with the company partners.
- L3 users can view all pricing levels (L1, L2, and L3).

5. Pricing Visibility

The website must display prices according to the user's assigned privilege level:

- L1 Users: L1 prices only.
- L2 Users: L1 + L2 prices.
- L3 Users: L1 + L2 + L3 prices.

The system must ensure that users cannot access pricing beyond their assigned privilege level.

6. Admin Panel

The admin panel should allow administrators to:

- View all registration requests.
- Approve or reject users.
- Change user access levels (L1, L2, or L3) at any time.
- Edit user information if required.
- Search and filter users based on company, city, domain, or access level.
